

One day symposium: The transcriptome - from functional RNAs to RNA drugs

Friday, August 24th, 2012
Lundbeck Auditorium, Copenhagen Biocentre

Program:

9.30 - 10.10	Sakari Kauppinen , Professor, Aalborg University, Aalborg, Denmark <i>"Targeting of microRNAs for therapeutics"</i>
10.10-10-50	Art Levin , Executive vice president Research and Development at miRagen Therapeutics, Colorado, USA, <i>"The art and science of oligonucleotide therapeutics: peering into the past for help with the future"</i>
10.50 - 11.10	Coffee
11.10-11.50	Jørgen Kjems , Professor at Aarhus University, Aarhus, Denmark, <i>"Circular non-coding RNAs - new type of players in gene regulation"</i>
11.50-12.30	Marie Öhman , Professor at Stockholm University, Stockholm, Sweden <i>"Brain specific microRNAs regulated by A-to-I RNA editing during development"</i>
12.30-13.30	Lunch
13.30-14.10	Eduardo Eyras , Professor at Pompeu Fabra University, Barcelona, Spain <i>"Epigenetic regulation of RNA"</i>
14.10-14.50	Albin Sandelin , Ass. Professor at University of Copenhagen, Copenhagen, Denmark <i>"Non-coding RNA expression defines an in-vivo enhancer atlas in human primary cells and tissues"</i>
14.50-15.05	Coffee
15.05-15.45	Steven Brenner , Professor at University of California, Berkeley, USA, <i>"Widespread alternative splicing coupled to nonsense-mediated mRNA decay, associations with networks of splicing regulation, and with ultraconservation"</i>
15.45	End of programme

The
Danish Council for
Strategic Research
